

Klipfolio Dashboard QuickStart Programs

Selecting any new technology whether for business or personal use, can be a stressful process.

If that process involves the selection of a KPI Dashboard to provide operational visibility of key business metrics to enterprise users, we can eliminate risk and remove any doubt about your choice of partner. We have assisted leading companies like Lufthansa, IBM, and American Express with their operational business dashboard needs. With over 1 million users in 30 countries we can make it simple for you.

The Klipfolio Dashboard QuickStart program gives you flexible, cost-effective options to get a proof-of-concept deployment up and running in your environment enabling you to showcase your operational business metrics using Klipfolio Dashboard.

Make an informed decision

A key component to the QuickStart program is working with you and your team to understand your business goals, the IT environment and then work with your team to develop compelling visualizations using Klips in a proof-of-concept build that aligns with these goals and clearly demonstrates its value to your business stakeholders.

Depending on the scope of your deployment you can choose a 60, 75 or 90 day evaluation period, a select number of user licenses for your decision makers, and a dedicated engagement from Klipfolio professional services** to get your evaluation kick-started.

The QuickStart program provides everything you need for a successful outcome; the rapid development environment and client licenses, plus our experience, guidance and support. All focused on making your evaluation and deployment a success. This also allows you to see the real business benefits and the return on any future investment. Everything you need to ensure a thorough analysis of Klipfolio Dashboard and a successful outcome.

Business benefits

- *Eliminate technology selection risk*
- *Visualise operational business data, make it actionable*
- *Access to dedicated experts – 100% committed to your success*
- *Extended evaluation period to allow thorough evaluation*
- *Demonstrates proof of concept to internal stake holders*
- *100% of Quickstart cost taken off license price on purchase**
- *Creates trust for a mutually beneficial business relationship*

After your evaluation period you can choose to license Klipfolio Dashboard and continue your deployment. When you do move forward with a license, we will credit the full cost of your QuickStart program towards your license*. Should you decide that Klipfolio Dashboard is not for you, that perfectly fine, you know we are always here to help with your operational business reporting needs in the future.

QuickStart Options

About Klipfolio Inc.

Klipfolio develops Klipfolio Dashboard — The KPI Dashboard — to help the Fortune 1000 increase the visibility of business information for faster, informed decisions that improve performance and profitability. Klipfolio Dashboard is the only business dashboard that presents operational information directly on the desktop where it's always visible, accessible, and actionable. Founded in 2001, Klipfolio is privately held and headquartered in Ottawa, Canada. Clients include Intel, Staples, EMC, and Lufthansa. For more information, visit <http://www.klipfolio.com>.

**Full amount of the Quickstart program is applied towards year 1 license and support fees only.*

***Professional service engagement hours must be utilized during the evaluation period.*
