OEM Dashboard software for the enterprise

Differentiate your product while staying focused on your core business. Drive application adoption while demonstrating results where end-users see them. Do it all with Klipfolio Dashboard.

You can release a full-featured product in less time. Eliminate the time and risk of developing a dashboard for your enterprise software solution by embedding desktop dashboard software designed to your specifications.

An OEM relationship that adds value

Klipfolio is the KPI dashboard for business. Trusted by fortune 1,000 customers in over 30 countries, it's the only dashboard software that brings real-time performance metrics directly to the desktop so they're always visible and actionable.

Light-weight, standards-based, and secure, the Klipfolio Dashboard platform scales to 10s of thousands of users and is easy to integrate with common formats and protocols: ODBC, XML, CSV, MS Reporting Services, SOAP and more.

You get more than dashboard software with a Klipfolio OEM agreement. You gain the support, services, and marketing know how of an organization dedicated to helping your dashboard-enabled software product succeed.

Business benefits
